# Rockpool Rambles

## MAKE A SURVEY OF LIFE

### TASK 1

Sketch the outline of the rockpool and look closely at each part and under the seaweed to find out which creatures and plants live there. Draw these in your rockpool sketch. Be careful to put seaweed and stones back where you found them otherwise the creatures who live there might die.

- Producers are at the bottom of the food chain.  
Draw on the map all the types of seaweed you can see.
- Mark on any rocks that may have life underneath.  
If you find any mark them on the map.
- Is the bottom of your rockpool covered with sand, stones, just rock or anything else? Mark these on the map.
- Can you spot any creatures from the website?  
Mark them on the map with an X and their name.
